## **FUND OBJECTIVE**

The Balanced MultiFund aims to provide moderate levels of growth with moderate levels of risk and volatility over the medium to longer-term.

The Sub-Fund is actively managed and is not managed in reference to any benchmark. It is managed by reference to a performance target which is to outperform USD 3M SOFR +1% to 3% over a minimum three years.

### SUITABILITY & RISK AND REWARD

The Balanced MultiFund is suitable for clients with an investment time horizon of a minimum 3 years. Investing in the fund involves a risk to capital in order to achieve the desired return.

To achieve the investment objective, the portfolio invests across a range of asset classes within a strategic and tactical asset allocation framework designed to maximise diversification benefits. An absolute and relative valuation-based approach underpins this framework, resulting in a multilayered process to facilitate disciplined decision-making and risk management.

Portfolio construction combines exposures to active fund managers, who are expected to outperform their defined benchmarks and passive investment vehicles which provide low cost access to markets. This blend of active and passive funds is used to create a competitively priced investment solution

## KEY RISKS

- The Fund could lose money if a counterparty with which the Fund trades becomes unwilling or unable to meet its obligations, or as a result of failure or delay in operational processes or the failure of a third party provider.
- Shares can lose value rapidly, and typically involve higher risks than bonds or money market instruments. The value of your investment may fall as a result.
- The Fund invests in other funds (including exchange traded funds and investment trusts/companies), which may introduce more risky assets, derivative usage and other risks, as well as contributing to a higher level of ongoing charges.

   The Fund may use derivatives with the aim of reducing risk or managing the portfolio more efficiently. However this introduces other risks, in
- particular, that a derivative counterparty may not meet its contractual obligations.
   If the Fund holds assets in currencies other than the base currency of the Fund or you invest in a share class of a different currency to the Fund
- (unless 'hedged'), the value of your investment may be impacted by changes in exchange rates.

  Securities within the Fund could become hard to value or to sell at a decired time and price, especially in extreme market conditions when asset
- Securities within the Fund could become hard to value or to sell at a desired time and price, especially in extreme market conditions when asset prices may be falling, increasing the risk of investment losses.
- The value of an investment and the income from it can fall as well as rise and you may not get back the amount originally invested.
- Tax assumptions and reliefs depend upon an investor's particular circumstances and may be subject to change.

August 2024

### MARKET COMMENTARY

August got off to a challenging start, driven by escalating concerns about a potential economic slowdown in the US. The catalyst for these renewed concerns was the release of the US jobs report, which showed nonfarm payrolls increasing by only +114k in July, below expectations of +175k. Additionally, previous months' job numbers were revised downward, and the unemployment rate edged up to 4.3%. This combination of weaker data points sparked investor anxiety, raising fears that a US recession could be a real possibility.

In isolation the jobs report may not have had such a pronounced impact on markets, however it followed the Bank of Japan's decision to raise interest rates on July 31, which strengthened the yen. With the US jobs data pointing to a potential rate cut by the Federal Reserve, the US dollar weakened (and the yen strengthened further) as expectations for rate cuts intensified. This dynamic put pressure on investors who had been borrowing in yen at low-interest rates to invest in higher-yielding currencies elsewhere, a strategy that quickly unravelled. The result was a sharp selloff in Japanese markets, with the TOPIX index dropping -12.2% on August 5 and the TOPIX Banks index tumbling by -17.3%. This turbulence then spread to other global markets, with the VIX volatility index (commonly referred to as the market "fear index") spiking to its highest level since March 2020.

Following the early shock, positive data helped calm markets. Lower-than-expected weekly initial jobless claims signalled that the labour market might not be cooling as quickly as feared, while strong retail sales data further supported confidence. Reassuring comments from the Bank of Japan's Deputy Governor Uchida about a cautious approach to future rate hikes also helped stabilize sentiment.

Later in the month, Fed Chair Powell's dovish speech at the Jackson Hole Symposium reinforced expectations for rate cuts, stating, "The time has come for policy to adjust." Combined with core inflation easing to +3.2%, the lowest since April 2021, this strengthened the belief that a 0.25% rate cut by the Fed in September was imminent, with the potential for larger 0.50% move if required.

In terms of market returns, despite the early weakness, global equities (+1.7%) were positive in August despite was a degree of variation across regions. The US (+2.4%) was the strongest area, while Japan (-2.7%) lagged as the stronger yen put pressure on Japanese exporters. In terms of equity styles, growth stocks (+2.4%) underperformed value (+2.8%), and small-cap stocks (+0.2%) lagged large caps (+1.7%). A mixture of recession-proof and interest rate-sensitive sectors outperformed, with Consumer Staples (+5.0%), Healthcare (+5.5%), and Real Estate (+5.4%) as the top-performing sectors, while Energy (-0.3%) and Consumer Discretionary (+0.7%) lagged significantly.

Fixed income markets were positive over the month, with higher-quality (more interest rate-sensitive) government bonds slightly underperforming credit. Expectations of central bank cuts amidst softening labour data pushed bond yields lower, meaning that the Global Aggregate bond index rose +1.1% over the month. Credit spreads also tightened as markets regained their poise intra-month, with both global investment grade (+1.2%) and high yield (+1.5%) gaining over the period.

In the real assets space, both global real estate (+6.0%) and global infrastructure (+4.6%) were well bid. However, commodities (+0.0%) were flat overall, despite a degree of variation within the index which saw Gold (+4.1%), Industrial metals (+3.4%), and Agriculture (+1.3%) rise, while Oil (-3.6%) fell.

### PORTFOLIO COMMENTARY

The end of August saw the Balanced MultiFund closing the month with gains of around +1.8% for the US dollar share classes and +0.9% for the GBP share classes, the difference reflecting dollar weakness over the period.

Within equities, our top performers were our quality managers Fundsmith Equity (+3.9%) and Morgan Stanley Global Brands (+3.6%), driven by their overweight positions in consumer staples and healthcare stocks. Our exposure to the US through the iShares Core S&P 500 ETF (+2.4%) also saw gains for the fourth consecutive month, although it lagged slightly as the Magnificent Seven stocks lost ground. Meanwhile, TT Emerging Markets Equity Fund (+2.5%) performed well, supported by expectations of Fed rate cuts, which weighed on the dollar.

# NEDGROUP INVESTMENTS MULTIFUNDS PLC BALANCED MULTIFUND

Our fixed income positions were all positive for the month, benefiting from a flight to quality amid growing concerns about the economic outlook. The prospect of faster rate cuts by the Fed led to a decline in yields, which in turn helped our longer-maturity iShares \$ Treasury Bond 7-10YR ETF (+2.2%) outperform the shorter-maturity iShares \$ Treasury Bond 1-3YR ETF (+1.1%). Additionally, the stable corporate earnings outlook continued to support the Nedgroup Global Strategic Bond Fund (+1.0%). Our exposure to emerging market local currency bonds via the Colchester Local Markets Bond Fund (+3.0%) also benefited from the depreciation of the US dollar.

Elsewhere, our real asset and alternative strategy holdings delivered a wide range of performances. Notably, our listed global REITs holding, Nedgroup Global Property Fund (+5.5%), performed well as yields fell. In the UK care homes sector, both Impact Healthcare REIT (+3.5%) and Target Healthcare REIT (+4.5%) posted solid gains, benefiting from strong results that highlighted inflation-linked rent reviews, leading to higher property valuations. Within renewables, Greencoat Renewables (+3.8%) was bolstered by recent transactions, including the acquisition of a 50% stake in the South Meath Solar Farm in Ireland. The Renewable Infrastructure Group (+0.9%) was marginally positive but delivered encouraging news with the sale of a 15.2% stake in the Gode offshore wind farm in Germany for €100 million, representing a 9% premium to its December valuation. Additionally, the group initiated a £50 million share buyback program, signalling management's confidence. In contrast, Greencoat UK Wind (-1.0%) and John Laing Environmental Assets Group (-1.4%) ended the month lower. Our traditional infrastructure holdings diverged, with 3i Infrastructure (-2.1%) underperforming while Atlas Global Infrastructure (+3.0%) posted gains. Finally, our position in gold, via WisdomTree Core Physical Gold ETC (+3.5%) performed well, benefiting from a weaker US dollar and falling bond yields, which reduced the opportunity cost of holding gold. The metal's safe-haven appeal also continued to attract investors amidst rising geopolitical risks.

Within our alternatives, the asset-backed lending position, GCP Asset Backed Income Fund (+4.7%), continued to perform well as it progresses with its wind-down strategy. Our private equity holdings delivered mixed results, with Princess Private Equity gaining (+1.4%) while Oakley Capital Investments declined (-0.8%). Lastly, our energy efficiency holdings were disappointing, with SDCL Energy Efficiency (-6.9%), Gore Street Energy Storage Fund (-2.7%), and Gresham House Energy Storage Fund (-10.9%) all posting negative returns.

In terms of portfolio activity, we took advantage of recent market volatility by reducing our cash holding in favour of the iShares S&P 500 ETF, which had experienced a significant drawdown. We also replaced our passive holding in Japanese equities, the iShares Core MSCI Japan ETF, with the boutique active manager Lazard Japanese Strategic Equity Fund. Additionally, as credit spreads widened, we increased our holding in the Muzinich Short Duration High Yield Fund, funded by selling government bonds that had appreciated in value as yields fell. Finally, with the recovery in Empiric Student Property, we fully exited our position and reinvested the proceeds into US small caps through the iShares S&P Small Cap 600 UCITS ETF. We also trimmed our positions in GCP Asset Backed Income and Oakley Capital Investments in response to further improvements in their prices.
